

In Canva this is how we create a big button template

- 1) Make a 2.8" outer circle solid colour (this will not be visible it gets wrapped around the outside.)
- 2) Make a 2.3" Frame to keep your design within (this is the size of the visible area on the button)
- 3) bring in the exported .pdf (best for printing) or log into your Canva when you come to the MakerSpace. We will print the pages out then. Please do not pre-cut circles we have a machine for that.

In Canva this is how we create a little button template

1) Make a 2" outer circle solid colour (this will not be visible it gets wrapped around the outside).

2) Make a 1.5" Frame to keep your design within (this is the size of the visible area on the button)

3) bring in the exported .pdf (best for printing) or log into your Canva when you come to the MakerSpace. We will print the pages out then. Please do not pre-cut circles we have a machine for that.
